“Refreshing, encouraging and inspirational recipe of academic lessons and cutting edge developments.”

Jordi Limiñana, Limitronic

“More than helpful for an equipment developer.”

Volker Steffen, KBA Kammann

YOUR PERSONAL MAP TO INKJET

PRINTHEADS • CHEMISTRY • SURFACE SCIENCE
MECHATRONICS • FLUID CONTROL • ELECTRONICS
EMBEDDED SOFTWARE • IMAGE PROCESSING • COLOR
VISION SYSTEMS • CURING & DRYING • APPLICATIONS

“The conference exceeded my expectations. The inkjet training session was very helpful even as an experienced printer engineer. The technical talks were effective and helped me identify better research paths in my own job. I look forward to attending future TheIJCs.”

Adam Kohn, Nike

“Excellent conference to understand the latest printhead technology.”

Dan Denofsky, Kodak

“A very effective combination of conference content and exhibition, laid out and organized to make networking effortless.”

Rob Day, TTP

“It is an eye opener to new areas and a great opportunity to see new technologies.”

Solomon Kimani, Domino

“It is the home of inkjet community.”

Sonia Morselli, BASF

The Inkjet Conference

Inkjet Engineering & Inkjet Chemistry

The IJC USA
12-13 April 2018, Chicago

191 REASONS TO JOIN TheIJC

We often focus on just one element of "inkjet", either highlighting the importance of the ink or the printhead. The reality is, the inkjet system has many more components as shown in our mind map. Only the selection and integration of these components together with a strong understanding of the application can bring about a successful product. Inaugurated in 2014, **The Inkjet Conference has grown to the world's largest inkjet knowledge platform bringing together technology and market experts from different fields.** TheIJC is the meeting place for key industry players and leading research institutes. Their cumulated expertise provides for a strongly technical conference program and unique networking opportunities.
